Aspect of foreign News -- The intelligence lately received from Europe evidently preponderates towards the point of war: The following may not be deemed an incorrect comparison between the prospects of War or Peace. CF WAR.

It is certain that the camp formed in the vicinity of Paris, and to which other regular troops were haftening from feveral politions in Germany, has been broken up, and the body been ordered to re-enter the new formed states of that empire.

It is certain, that the states which formed the new Federation of the Rhine, has been ordered to furnish their quota of troops, agreeable to their flipulations made with France.

It is certain, that, instead of dismissing any part of the regular army, even that class of the foldiers whose age and fervices entitled them to repose, Bonaparte has ordered a new and very formidable body of conscripts to be raised and equipped for immediate fervice.

It is certain, that a ferious misunderstanding exists between the French and Pruffian governments ; -- that the latter has fettled its differences with been convoked this day. It is certain that the emperor Francis, though deprived of many branches of the ancient House of Austria, has Rill left an immense population; and that the most active exertions have been made under the immediate direction of his illustrious brother, the Archduke Charles, to place the army of Germany in the highest state of preparation for

It is certain, that throughout the Italian coast, the British have a formidable maritime fquadron; and that this force, joined by a confiderable body of English and native troops, are enabled and have frequently effected the mot important operations against the French in that quarter.

It is certain, that Russia has augmented her effective troops to the numbe of 500,000 men ;--- that the most abl and experienced Generals have been placed at the head of her armies ;- that at this moment the has a very large force encamped on the frontier ; --- and that very confiderable detachments of troops had been embarked for Pomerania.

It is certain, that a formidable Coalation is now maturing in the north o Europe, against France--- that in this confederacy will probably be joined, the great powers of England, Ruffia, Pruffia, Auftria, Sweden and Denmark --- and that in the formation of this immence
